

How to ask a great question

This quick sheet is meant to supplement the in-depth discussion within the guide. Use it to ensure you hit the required elements for a SMART question.

- Specific
- Measurable
- Achievable
- Realistic
- Time bound

Is what you're asking for **specific**? Enter the specific part of what you want done below.

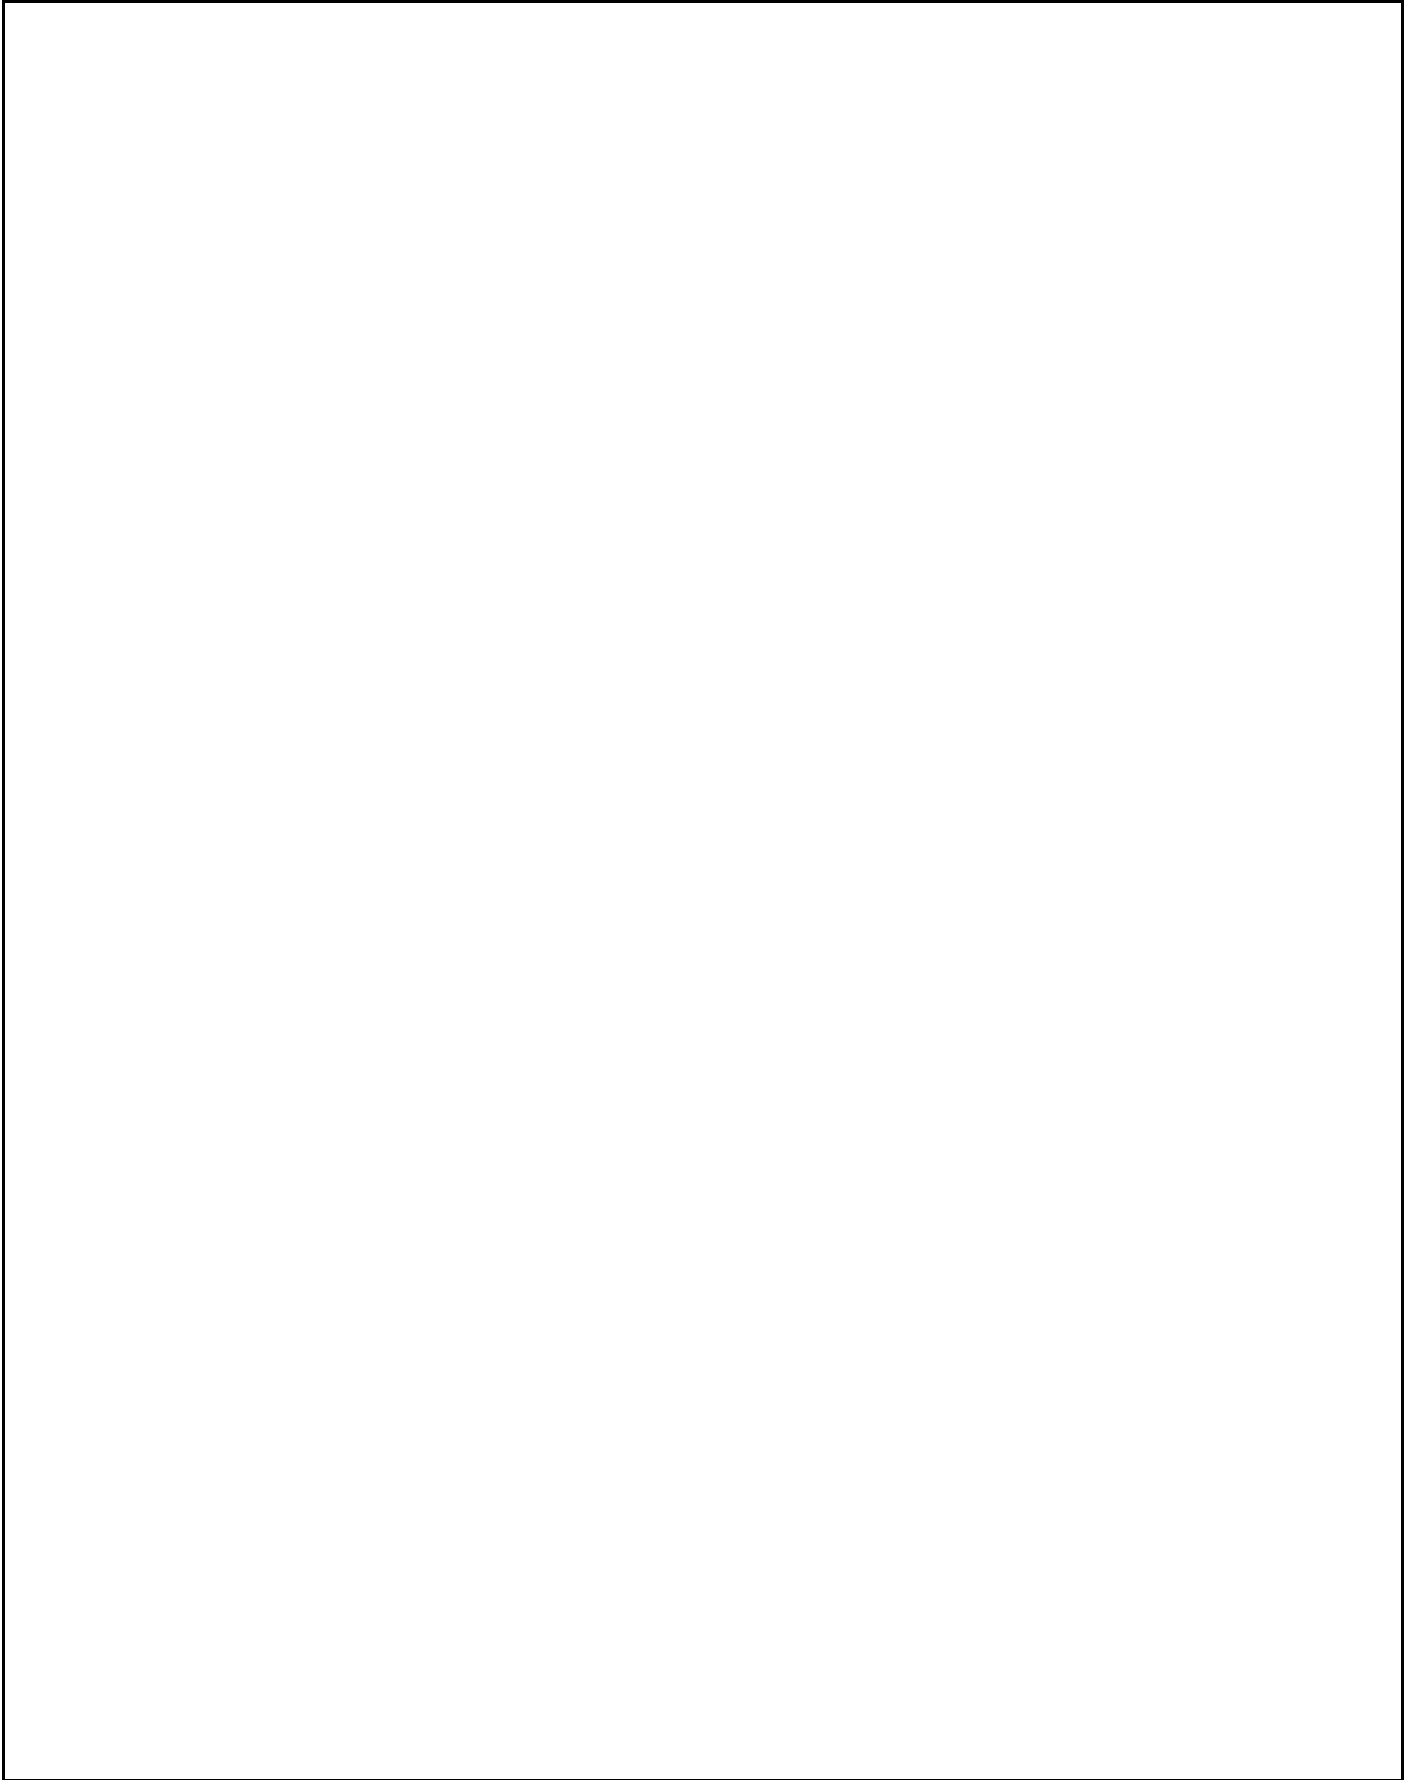

Is what you're asking for **measurable**? Enter the measurable part of what you want done below.

Is what you're asking for **achievable**? Enter the achievable part of what you want done below.

Is what you're asking for **realistic**? Enter the realistic part of what you want done below.

Is what you're asking for **time bound**? Enter the time constraints below.

Now put the whole thing together in a SMART question:

A large, empty rectangular box with a thin black border, intended for the user to write their SMART question.

Congratulations, you now have a SMART question that you can ask your freelancer.
